About Us:

Clamp-Swing Pricing Company was founded in Alameda in 1924 and moved to Oakland in 2000. We continue as a family run company to this day. Our primary business is making plastic signs, sign holders and fixtures for supermarkets. In this time of the Covid-19 crisis, we are open because we are considered an essential business, supplying these stores with products they need to operate. We realized we have the equipment, technical know-how and personnel to make these Face Shields, and have developed a plan to manufacture them.
