

HANGING SIGN HOLDER

(FOR 11³/₄" SIGN CARDS)
ASSEMBLY INSTRUCTIONS

To Assemble:

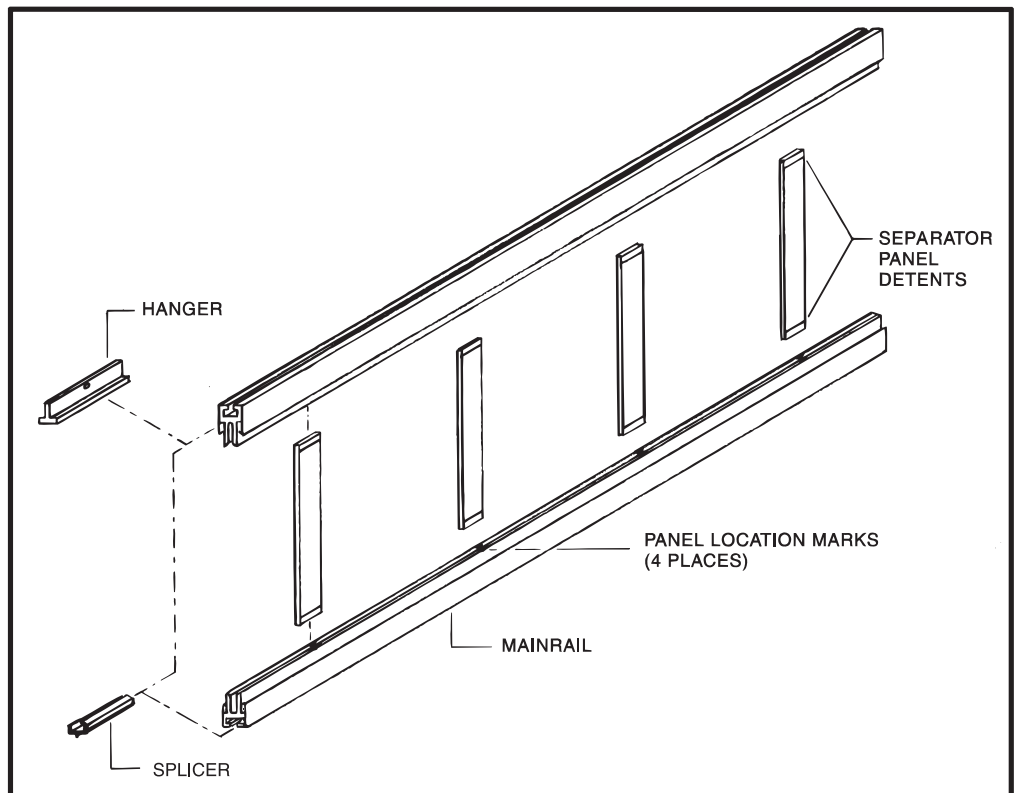

1 Place a Mainrail on a table with the legs up. Snap a Separator Panel into the slot between the legs at each of the four Location Marks. (The detents on the panels will lock into the barbs in the slot.)

2 Lay the assembly flat on the table. Take a second Mainrail and press it onto the exposed ends of the Separator Panels until it snaps into place. Be sure the ends of the Mainrails are evenly aligned.

3 Slide the two Hangers into the "T" slot of the top Mainrail. (The assembly is symmetrical; either piece can be the top.)

4 To connect assemblies for a continuous run, slide a Splicer into one end of each Mainrail about half way. Take a second completed assembly and press or tap it onto the exposed half of the Splicer until it butts up against the other unit.

5 Hang the units with the appropriate materials as directed by Store Operations. No additional hardware is provided in this package.
